TECHNE CATALOGUES EXPANDED

The new Techne catalogue introduces innovative cooling products and the extended thermal cycler range. Over 50 pages illustrate Techne's temperature control and science equipment for the life sciences, research, clinical and general laboratories. Significant additions in the new catalogue will solve sample-cooling problems in many labs. The N° ICE electronic ice bucket contains ceramic-coated beads, and the B^lockice cools tubes held in two Dri-Block inserts. The Techne family of personal thermal cyclers is joined by the expanded capacity TC-3000X and the TC-3000G. Users of standard thermal cyclers will welcome the appearance of the new-look TC-4000 and TC-5000 at attractive prices.

MINI DISPENSE PUMPS FROM LEE

A new brochure detailing the complete range of miniature dispense pumps is now available from Lee Products. The pumps are available in three types, high and standard performance LPV stepper motor driven models, along with LPL solenoid pumps which provide dispense volumes from as little as 50 microlitres to 3000 microlitres. These pumps, which are an ideal alternative to conventional syringe or peristaltic pumps, combine a compact lightweight design with low power consumption so they can be located wherever fluidic requirements dictate, regardless of maintenance accessibility.

LIT SHOWCASE GOES LIVE!!

Laboratory News is proud to announce that the Literature Showcase section is now available online. We now have a page on our website devoted to all of the latest catalogues and brochures, full of the best laboratory products and equipment.

With hotlinks to online versions and request pages, it will be easier than ever for buyers to browse before they buy.

If you have a catalogue or a brochure containing products that you think would be relevant to our readership then don't hesitate to get in touch and promote your literature both in the magazine and online.

SET THEM FREE!

Are your product brochures and catalogues stuck in the store cupboard, shoved under that spare desk or collecting dust on top of that old filing cabinet?

Wouldn't it be better if they were given a second chance in life – the opportunity to roam free about the UK laboratory market generating sales leads for your company?

Why not offer them a new lease of life by advertising them on this very page?

Advertise your literature here and you give it the chance to enjoy life to the full – and help your company at the same time.
